

Jan Kotania

Fullstack Developer & AI Engineer

Computer Science graduate and software developer with over 2 years of experience building mobile apps in Flutter and web apps in Next.js. I combine fullstack development with practical AI work: data quality, model training and integration into real products.

Experience

Full-Stack Developer TechInShot

Jul 2026 – Present, Remote

React.js Next.js TypeScript Node.js Flutter Claude Code

- Develop and integrate cross-platform mobile features in Flutter with Node.js backends, with seamless client and server communication.
- Architect and build responsive web dashboards with Next.js, React and TypeScript.
- Speed up feature delivery by using Claude Code for rapid fullstack prototyping.

AI Data Specialist TELUS Digital

Jun 2025 – Jan 2026, Remote

- Kept data quality and consistency high for AI/ML training sets by strictly following project guidelines.
- Found and helped resolve data inconsistencies, reducing risk to model quality, and delivered annotation tasks on time for critical AI projects.

Junior Software Developer Kombuczara

Oct 2023 – Mar 2025, Remote

Flutter TensorFlow YOLO Firebase API design

- Led end-to-end development of a mobile app and integrated an AI algorithm that improved image recognition by **26%**.
- Integrated third-party APIs (Google Maps, TikTok), contributing to a **34%** increase in active users within 3 months.
- Turned stakeholder requirements into user-friendly interfaces that drove adoption and engagement.

Tutor Kodland

May 2024 – Jul 2025, Remote

- Mentored students through full projects, from concept to finished websites and games, breaking complex work into clear milestones (Python, HTML, CSS, JavaScript).

Intern Grupa ATERIMA

Jul 2023 – Sep 2023, Kraków

- Handled 40+ service requests a month (C#, Enova365, Microsoft SQL Server, ERP) and monitored system health, contributing to a **15%** increase in system availability.

Projects

MoldAR AI mobile app

Flutter, Python, Roboflow, Firebase

- Trained and deployed a custom YOLO model that detects food mold in real time, telling harmless discoloration apart from toxic mold with **91%** accuracy.
- Built a cross-platform Flutter app with on-camera inference that warns users about potential health risks such as allergies and toxic spores.

Achievements

- First place** in the Radio Silesia mobile app design competition.
- Engineering thesis defended **with distinction**.

Education

Silesian University of Technology

Computer Science
Gliwice, 2026 – 2027

Academy of Silesia

Computer Science
Katowice, 2021 – 2025

Skills

JavaScript TypeScript React.js
Next.js Node.js Flutter Python
TensorFlow YOLO HTML CSS
REST API C/C++

Tools

Claude Code Figma Framer
